Preamble: The *Solar System*, the intended human abode, is a *Divine Scripture* decided at origination and *Preamble to the Universe*. Being humans–the unique species capable of analysing unseen and its causal relations–we must hasten to learn about ourselves, species around us, nature and its phenomena, vast scientific knowledge discovered by untiring scientists, and divine wisdom brought by prophets and visionaries. We must explore the origination of **THE HUMANICS** guided to light; scientific teams that reach to the solar system including our home planet Earth, and comprehend this Preamble of the infinite universe. We're on the cusp of a profound disclosure satisfying the extreme intellect, befitting the loftiness of the sublimest creation in universe, human, about to disclose myriad universal truths of essential unresolved mysteries. Exceptionally competent intellects need to be teamed up to enter the realms of this ***Revealing Wisdom***. All systems in nature are related to existence and protection. Destructive tendencies felt anywhere are only temporary events towards existence, not disaster. In this heavenly abode of virtue and existence only human mind establishes vice and disaster. All the prophets, scriptures they left, truths free of conjectures, reformers who strove to prevent humankind from slipping into ruin and nanolevels and fetch knowledge about formation and constitution of matter; brave groups that study species under water, on land, in sky to expose great understanding about their nature and features; space researchers fetching intricate scientific knowledge about organisation and functioning of solar system and universe; and every centre engaged in studies about origin of universe have a role in ***Phase Ceenom***.

« RULES FOR SPACE TIME SOUL REVEALS TO HUMAN: WHO AND WHAT FOR I AM »

Nine Stages: Mathematics that controls, operates and nurtures matter, energy and nature of the entire universe including our body is formed from 9 stages: the 3 irremovable facts of space-time-consciousness; the 3 related feelings; the 3 denoting basic hues that surround matter, and the Book of Light that exposes and describes the entire universe. Beyond '9', maths concludes the stage of our return to our abode the *unseen*. As maths is essential, we use the concluded 10 as a unit infinitely. The 9 stages of maths include *all* scriptures and principles. As the body and life elements constituting the medium for a coming soul is prepared centring the sperm and egg that join for this, *Divine Rules* that make up a great guiding system that defines with highest precision the birth at its source, duties of owners–parents, deeds of human in this birth, the simple and quick way to this, how to set destination in the straight path, and how high and exalted a state that human is organised in. Let's name this system that includes space-time-consciousness trio, the related feelings and the denoting hues from physical knowledge phase as *huematics*. As this is solely for human mind, its true name is *humanics*. It's *you* and *me*; that is, nature itself is me and you; any disaster **« THE MOST EVIDENT »** aster we afflict it is self-affliction. Competent experts from every branch of science must join at once. As we observe from physical sciences, way of nature is *huematism*; the way to human destination is *humanism*; both are one; it's recorded in every particle and in the entire universe. The moment law of *maths* prescribed for human mind began functioning on the first particle to this *Phase of Ceenom*, the true descriptions of these ***Divine Rules*** remained hidden.
