

**Face:** Human kept that feeling regarding the unseen as a primal supreme power, god, destructive authority, a foe to be kept satisfied or kept at a distance, a protector providing refuge and help, and in countless other undefinable forms. Thus it existed at different times as a wide variety of beliefs and forms of worship, influenced humans, and changed as time passed. Even now, the awareness regarding an unseen creator exists in human minds in different forms with no possible unified definition. We can know from this that only human keeps a notion of the unseen and an unseen Creator, and no other species has it because the knowledge regarding the unseen hasn't been given to them. It means, the human species is the only direct creation designated as a representative to this created world with knowledge regarding the Creator. While the truth will get exposed later, God's statement to angels: "I'm about to place a vicegerent on Earth" (Q2:30) seems appropriate here. Having granted vicegerency by the very birth, we can imagine all the systems human received along with him,

nature, ocean and land, the species around him, the sky and planets, even the composition of body given to him, its cells and ordering, need to be with him as helper and guide as God's representative, in forbidding vice and enjoining virtue, in the life's journey from darkness to light and from matter to reality. We can also believe that every piece of scientific wisdom we acquire will act as guidance. It's realised that even in the definition of chemical elements that constitute matter which forms the fundamental components of the creation of the universe, lessons regarding this essential journey are included. It's a fact that in each of our cells, genes and chromosomes, knowledge regarding this is recorded. That the human body itself is designated to give guidance to human mind is a way of education possible only by God. A team of exceptionally competent scientists and researchers from every acquired branch of science only can begin such a journey of greatest profundity. This has become the reason for this Message. Such competent individuals and groups must get ready at once.

⌘ THE MANIFEST ⌘

**Profound:** As causality is the basis of the universe, only a causal chain that begins with a *First Cause*, like the first particle of material universe, that isn't the effect of another cause can maintain the universe eternally functional and live. Can human mind visualise such a *First Cause*? Did this ability remain hidden as the necessity never arose? Confirming all stages of spiritual and scientific knowledge from first human until now, the *Revealing Wisdom* discloses primal facts with logical evidence. Preserved for humanity by nature, to be bequeathed to generations, the phase of *ceenom* defines every branch of science at its basis, provides proofs, prescribes guidance and sets up a comprehensive system of education based on fundamental principles. It guides us to inner principles of the unseen

behind evolution of entire universe from first particle, leading to the *final truth* beyond the material and operational knowledge we now possess. The strong but hidden interrelations in history, atoms, cells, species and planets will appear distinctly as we approach resolutely with clear logical reasoning. We need to begin reading into a phase when just as cells testify to the living beings, chemical elements testify to the material universe. *Golden ratio*, an ordering of numbers, indicates state and constitution of matter (space). *Geometry*, union of lines and curves, denotes motion and relates energy and time. The unique *face* given to each individual is a strict order; we identify it unmistakably among myriad faces. Human, provided with ultimate intellect and ability to think about true laws of unseen, is

the *cause* for creation of universe. A form that denotes human must denote consciousness, the common human face, and must include golden ratio and geometry. The phase when we know own forms of fundamental golden ratio, fundamental geometry and fundamental creation of human face *are all one* marks the journey to a phase of greatest profundity. The *Revealing Wisdom* discloses a most significant fact that a unique Scripture testified by structure of atoms, DNA of cells, numeric keypad [123;456;789], fundamental trio of space-time-consciousness, solar system and myriad universal phenomena existed amidst us for centuries in encrypted formula form despite being believed as a language text. Once decrypted, it exposes mysteries behind the universe, human mind and consciousness.

**Proceed:** All heads of nations, the UN, international courts, religious heads, spiritual leaders, thinkers, writers, rationalists and agnostics need to note the Message with utmost seriousness and sense of responsibility. Heads of universities and research centres, mathematicians and scientists have to ponder upon this. Human rights officials, judges, social reformers and visionaries must fulfil obligation to the *Revealing Wisdom*. Since it's for the sole purpose of fulfilling the covenant between the soul and the *First Cause* that knowledge, authority and opportunities are given, it's the duty of heads of nations, judiciary, scientific communities, reformers, research organisations and universities to grasp the Message in a most deserving way, sternly holding to the fundamental law that human-fashioned

with utmost eminence, given birth on Earth with exalted, profound intellect—is only one although diverse in race, country, belief or nature, and make urgent preparations for the forward journey unifying human as intended and ordered by birth. Just as air and water are one, beliefs regarding fundamental principles of creation *must be one for all of us*. Besides eliminating variances in beliefs, the wisdom unites humankind into one community, instils fraternity and creativity, provides infinite peace and tranquillity and guides with excessive speed to noblest positions in science and understanding befitting the intellectually-tuned human. The Earth must be reinstated to its most fertile, virgin state with pristine nature and climate, providing ultimate protection and care to all its species.

This wisdom will perfectly restore Earth, all its systems and above all humankind, to their peaceful states of existence. To enter the extensive areas of *ceenom*, a team of dedicated, highly competent intellects needs to be formed at once. More than 2000 mails were sent to *List Informed* including all the heads of nations, judiciary, the UN, reputed universities, research centres, social organisations, religious heads, eminent scientists, journals and media. A communication of such significance and urgency has never been sent in history nor sent to such a wide list of reputed centres. A study of the *List* reveals gravity and profundity of the matter. *We read about us, about why we're here and what our final destination is*. Answer to this earliest intellectual enquiry is obtained with analytical evidence.

**IN ESSE:** Unique significant matters descend before human, leading to a most serious, profound phase that manifests intricate matters of greatest importance. We struggled to grasp the fact of the moving globe once as we earnestly believed it to be flat and stationary. Even now, the reality that mountains, forests and oceans stay as if glued to its sides and beneath is hidden from our sight and feeling by the law of creation. So, it's impossible to approach a planet in space from its

bottom or the sides. While falling particles testify to gravity, this law remains just a theorem, unable to answer the 'why'. We must subject every fact and feeling to deep intellectual analyses. Do not blindly believe this Message without a close logical scrutiny. If pondering is your nature, read repeatedly. Slowly, but surely, you'll begin to recognise the disclosure of fundamental facts that govern the universe, build human intellect and guide him to the birth-intended destination.
